ring Ukraine

to use the script you need to do the following :

- download the zip folder and save it in “Downloads” at your mac.
- to unzip the folder you will need a password. To get it just ping me in Slack or contact me via ring e-mail.
- paste your range into the file “input.txt” and save it.
- to run the script double click on the “run” file, it will open the Terminal.
- “output.sh” file will be created in folder “raw_3.0” and the download will start.
- the downloaded range will be in /Data/india_team.
